IT MATTERS

THE REASON WE ARE HERE

In a time when humanity needs to rethink the future to sustain life on this planet, we consider responsible business a necessary game changer.

We imagine a world in which all businesses, regardless of size, take social, environmental and financial responsibility in all parts of the supply chain.

It is not naive. It is the inevitable future.

That is why we offer products made of 100% organic cotton for customers who want luxurious, sustainable goods of premium quality.

We want our products to last long enough to be passed on. And we insist on developing a new, sustainable standard of designed goods.

So we take no shortcuts and we constantly challenge to improve. That is how we make a small difference every day.

One certified organic product at a time.

We believe in the human ability to create change. We believe that respect comes when respect is given and we believe in the future.

That is why we are here.

RESPONSIBLE BUSINESS

Joy Vasiljev is known as a visionary, inspiring and uncompromising entrepreneur, who is not afraid to speak up and point out things that are not right.

It all started with a lot of questions. Why is it so hard to find textiles that combine great design with organic materials? Why do we have to choose between the two? Are we showing responsible behavior when it comes to protecting our planet?

In 2007, The Organic Company was established with the clear mission of proving that a responsible business is good business.

Every product is thoroughly considered with regards to both design and purpose because Joy believes that the better the product, the better you take care of it.

And this fits well with an organic lifestyle.

It was not an easy start. The world simply wasn't ready. And people were unaware of the extremely dirty industry of cotton.

12 years later, The Organic Company produces more than 200 different products and exports to more than 26 countries.

Today, Joy is an important voice in the debate on organic lifestyle, environment and sustainability. She teaches and gives speeches in order to open people's eyes to the fact that there are different and better ways of doing things.

Good intentions aren't enough. Change demands action.

Joy Vasiljev, founder of The Organic Company.

IT MATTERS

GOTS CERTIFIED BY SOIL ASSOCIATION

GOTS stands for Global Organic Textile Standard and is a global and strict standard within organic cotton and social responsibility.

Soil Association is a UK-based charity organization, which has been working with organic agriculture for more than 2 decades. Soil Association is our appointed certifier.

GOTS is a thorough standard with 40 pages of “zero tolerances” against pesticides, solvents, heavy metal and bad chemistry.

THE ORGANIC COMPANY IS GOTS CERTIFIED SINCE 2010 LICENCE NO 21797

And GOTS covers the entire supply chain from farmer, mill and dying house to sewing house and brand holder.

All of us are inspected. Every year.

Did you know ...

- that GOTS certified organic cotton production emits 94% less greenhouse gasses compared to conventional cotton production?

- that 91% less clean water is used in GOTS certified organic cotton production compared to conventional cotton production?

Source: Soil Association.

This is the reason why we have chosen to work with organic cotton certified by the strictest standards when it comes to environmental and social responsibility in every link of the supply chain.

LESS AND BETTER

Another perspective on the battle against fast consumerism, is a “LESS AND BETTER” way of living.

SIMPLE AND HONEST DESIGN – WITH A PURPOSE

It's okay to develop, produce and trade. And there is nothing wrong in consuming. There is just something wrong with the way we consume - and to which extent.

The planet is challenged. This is a generally accepted fact across the world.

Cotton is present in every aspect of our life. We dress in cotton, we dry ourselves with cotton, we sleep in cotton. Only, the production of conventional cotton has consequences for both the environment and people.

8
IT MATTERS

We believe in making high quality products that meet your needs because it means that you take better care of it and keep it for a long time. You may even pass it on.

It is our design philosophy that a new product must either solve a problem, meet a need or enhance a category.

Our design combines function, quality and aesthetics expressed in a simple and typically Scandinavian way.

We in The Organic Company believe that we all have the ability and the power to create change.

AND IT STARTS TODAY

What's your choice?

**Did you know that 2 millions
disposable plastic bags are used
worldwide every minute?**

IT MATTERS

Plastic or not

We package our products in recycled plastic bags. Here's the reason why.

A while ago, we wanted to replace the plastic because many of our customers have focus on plastic problems and of course, so do we.

We investigated biodegradable bags which appeared to be a great choice. Until we read reports saying the opposite. Many of them are actually not 100% biodegradable, they are too plasticized and can never dissolve.

This may cause even more problems, as people act like the bags are truly biodegradable. Secondly, they cannot be reused and, if being sorted like plastic, they interrupt the waste sorting for recycling purposes.

We consulted with the NGO, Plastic Change. They confirmed the above and suggested recycled plastic.

We package our products in (recycled) plastic in order to protect them from dirt and moisture. Both, which will damage our products. And once damaged, the goods have no value.

All in all, we are satisfied with our solution. Hope you are too.

Every little action makes a difference
